

AIR FORCE CIVIL ENGINEERING COMMODITY COUNCIL CONTRACT VEHICLE

TAXIWAY LIGHTING SPIRAL

The focus of these centralized contracts is on the conversion of current incandescent taxiway light fixtures in use on airfields with Light Emitting Diode (LED) fixtures to derive significant energy, maintenance and manpower cost efficiencies. This SPIRAL includes elevated (L-861T) and in-pavement (L-852T) LED taxiway lighting fixtures.

Contracting Officers will issue a Request for Proposal (RFP)/Solicitation directly to the two prime contractors awarded Indefinite Delivery Indefinite Quantity (IDIQ) contracts. These RFPs will not be posted on the Federal Business Opportunities website (www.fbo.gov). There may be potential subcontracting opportunities with the prime contractors.

Additional strategic sourcing projects (known as “spirals”) have been identified that will be initiated over the next several years. The initial wave of spirals currently consists of:

Elevator Maintenance: The focus of this spiral is on the preventative maintenance, corrective repair, and inspection/testing services performed on existing installed equipment (excludes new construction projects associated with MILCON, BRAC, etc.). For the purposes of this sourcing spiral, “elevators” includes vertical lift/transportation systems (real property) used for freight and passenger movement at CONUS Air Force facilities, including Alaska and Hawaii. Anticipate award in February 2013.

Roofing: The focus of this spiral is on the preventative maintenance, repair, replacement, and inspection services (labor) performed on existing installed assemblies (excludes new construction projects associated with MILCON, BRAC, etc.). For the purposes of this sourcing spiral, “roofing” includes all types of roofing structures (metal, tile, shingle, etc.) on CONUS Air Force facilities, including Alaska and Hawaii. Anticipate award in July 2013.

Automatic Gates & Doors: Areas under consideration include install, maintain, repair, and replace gates and doors, including hanger doors. Anticipate award in September 2013.

Appliances: Areas under consideration include dormitory appliance service contracts, rentals, and replacements. Award date to be determined.

Custodial: Scope of work to be determined. Award date to be determined.

HVAC & Chiller: Areas under consideration include repair and replacement of chiller water systems (chillers, pumps, piping, filters, and condensing towers) and air handling systems. Anticipate award in March 2014.

Rubber Removal: Areas under consideration include airfield joint repair, sealant, and maintenance. Anticipate award in September 2013.

Tank, Trap, Hood, & Duct: Areas under consideration include cleaning, repair, maintenance, and servicing of tanks (commercial and septic), traps (plumbing), hood (air exhaust units), and ducts (HVAC). Anticipate award in March 2015.

Fire Protection & Suppression: Areas under consideration include monitoring, testing, maintenance of controls (fire alarm panels and detectors), and fire suppression systems. Anticipate award in March 2016.

Paved Surface Striping: Areas under consideration include striping (includes sweeping) of base roads, parking lots, and airfields. Anticipate award in December 2015.

Generators: Areas under consideration include purchase, install, maintain, and repair real property generators. Anticipate award in December 2015.

Energy Management & Control Systems: Areas under consideration include repair and replacement of HVAC control systems with modern energy efficient systems. Anticipate award in March 2015.
